--------------------------------	------------------

Quarantine Totals by Facility	
Century Regional Detention Facility	0
Los Angeles Medical Center	0
Mens Central Jail	0
PDC-South	0
Twin Towers Correctional Facility	0
Total	0

- Since May 1, 2020 CHS has conducted tests to identify asymptomatic inmates.
- Individuals in custody who have tested positive and/or are awaiting tests results upon release are provided with information on CDC guidelines regarding self-isolation/care, as well as community resources. CHS makes notifications to DPH for official mandated tracking purposes.
- **Isolation** is designated for individuals who have a temperature of 100.4 or higher, or are exhibiting certain flu like symptoms consistent with an upper respiratory infection. All patients in isolation/under observation have either tested positive or have been tested pending results.
- **Quarantine** is designated for individuals who have had close contact with a PUI or Positive Patient.
- <sup>\*</sup> Total number of COVID-19 recovered
- <sup>\*\*</sup> COVID positive at the time of death, although COVID not necessarily a contributing factor.
- On July 6, 2022, DHS no longer differentiates between Asymptomatic and Symptomatic inmates in their notifications to LASD.

**Note:** Quarantine/Isolation totals are subject to change throughout the day based on medical directives.
